In Home Tech Support Business Course Program

Work, Money & Place | Local review edition | November 20, 2026

A bounded service, evidence and a complete owner cycle.

Five steps to a readiness decision

1. Choose one narrow service — L01 / F01. One supported two-page printing result and referral boundaries.

2. Check conditions and demand — L02, L03, L04 / F02, F03, F04. A dated comparison, permissions, coverage and buy/wait decision.

3. Rehearse the supported result — L08, L09, L10 / F08, F09, F10. Before-state, authorized change, repeatable customer test and a stop branch.

4. Estimate the complete cycle — L05, L06, L07 / F05, F06, F07. Independent pre-quote estimate, full customer confirmation and dated baseline.

5. Make a readiness decision — L14 / F14. Evidence for the narrow service, with unresolved limits and a wait decision where needed.

Stop at missing conditions or evidence. The route is a study order, not permission to sell or perform unverified work.

One narrow starter result: help an authorized household user print an approved two-page sample PDF from a supported personal Windows 11 x64 PC through an existing home network to the checked HP LaserJet M209dw, then repeat the task and receive a limited written handoff. L09–L10 provide the model-specific route. General repair, backup implementation and recovery competence are not outcomes of L11 overview coaching.

US first-time owner-operators who already demonstrate the supported household setup tasks or will obtain suitable supervised practice.

About 10–14 hours of study and exercises, plus separate permitted technical practice and local business research. Your actual time depends on existing skill; the course alone does not qualify you.

Start here

Begin with the five-step route below. Define the two-page printer task in L01/F01, then complete the conditions and demand decision in L02/F02 before equipment purchases. L09–L10 cover the supported Windows/home-network/M209dw task; L11 is a coaching and referral overview, not a general repair or backup qualification.

Use the complete fictional Case T to see how lessons, forms, stock and money fit. Keep your neutral forms and own-business planner separate from its filled examples.

The site stores practice answers and progress only in this browser. Export a backup. Word and Excel files are independent working copies; they do not synchronize with the site. Never enter real credentials in any teaching form.

No required video is needed. Historical episode/publication records are separate and current public availability was not verified. All required written instruction is included.

First action: Write the supported Windows 11/home-network/HP LaserJet M209dw two-page printing result and three stop boundaries in F01; open L02/F02 next for conditions and demand before buying.

Course route

Choose a workable local offer

L01 Choose a service you can demonstrate. Output: A supported-device offer and a written skill gap decision Practice allowance: 35 minutes.

L02 Test a local offer before buying equipment. Output: A documented buy wait or revise decision Practice allowance: 45 minutes.

L03 Set permissions and protect customer information. Output: A local permission record and data handling rule Practice allowance: 45 minutes.

L04 Prepare a small kit and a supported reference set. Output: A tested kit and model-specific reference list Practice allowance: 35 minutes.

Find clients and agree the visit

L05 Find customers with a clear local offer. Output: A two-week client finding plan and sample messages Practice allowance: 60 minutes.

L06 Turn an inquiry into an agreed visit. Output: An intake record and a specific service agreement Practice allowance: 45 minutes.

L07 Price the whole owner cycle. Output: A full-cost quote and a frozen accepted baseline Practice allowance: 50 minutes.

Diagnose and coach with consent

L08 Prepare the home and obtain change consent. Output: A before-state record and authorized next action Practice allowance: 40 minutes.

L09 Diagnose the network before changing it. Output: A test sequence that separates network and printer faults Practice allowance: 50 minutes.

L10 Install and test the selected household printer. Output: A verified printer task and a customer repeat test Practice allowance: 55 minutes.

L11 Deliver useful setup and coaching within scope. Output: A customer-owned quick guide and a separate setup decision Practice allowance: 40 minutes.

Close the job and prepare to launch

L12 Handle an unresolved fault or a paid change. Output: An evidence-based stop or change record Practice allowance: 40 minutes.

L13 Obtain acceptance and reconcile payment. Output: A customer demonstration, invoice and handoff Practice allowance: 40 minutes.

L14 Compare actuals and rehearse a complete first visit. Output: A full readiness decision backed by your own records Practice allowance: 55 minutes.

Starter boundaries

- Hardware or battery repair and electrical work
- Password bypass and unauthorized access
- Data recovery promises, malware eradication or security certification
- Employer/school-managed devices without appropriate authority

- Router administration, complex managed infrastructure and persistent remote access
- Full migration or unattended cloud/account changes

Files and readiness

The package contains 14 lessons, 14 working forms with separate examples, a complete fictional case, original teaching visuals and a nine-sheet formula planner with an independent Estimate. Counts follow the tasks.

- Demonstrate the supported printer/network task on permitted equipment and explain a safe stop branch.
- Show actual local registration/classification questions resolved for your service and location.
- Record actual applicable coverage and remaining exclusions.
- Preserve customer authority and specific consent before each consequential action.
- Produce a full-cycle quote that works under measured time and an adverse scenario.
- Show actual willingness for the same bounded offer; no invented bookings.
- Reconcile stock purchases/consumption, invoice/receipts, fees, reserves and free cash.
- Have the customer repeat the agreed task and retain a clear limited handoff.
