Handyman Business Course Program

Work, Money & Place | Local review edition v2 | November 21, 2026

A bounded service, evidence and a complete owner cycle.

Start with two small repair tasks

Assess matching cabinet pulls and one compatible V-seal door job.

Practice with permission and verify local contractor requirements before taking paid work.

Begin learning with L01. Check conditions and demand in L02 before buying or accepting paid work.

Five steps to a readiness decision

1. Narrow the two-task service — L01, L04 / F01, F04. One identified offer and an item-status map.

2. Check authority and demand first — L02, L03 / F02, F03. A dated conditions record and matching demand test.

3. Rehearse the complete supported task — L05, L06, L07, L08, L09 / F05, F06, F07, F08, F09. A permitted complete-method and acceptance record.

4. Estimate and obtain specific approval — L10, L11, L12 / F10, F11, F12. A full-cycle price, complete agreement, and controlled visit.

5. Reconcile and decide readiness — L13, L14 / F13, F14. Cash and stock closeout with an actual next action.

Stop at missing conditions or evidence. The route is a study order, not permission to sell or perform unverified work.

A bounded first offer: matching Liberty P28376 family cabinet-pull replacements in existing sound 4-inch mounting patterns, using the actual compatible provided fasteners, plus Frost King M13WH V-seal on one eligible ordinary door. Includes assessment, permitted representative practice, supported methods, checks, customer terms, and the complete business cycle.

A prospective US owner operator developing a small lawful competent home-repair service; no trade experience is assumed from the course owner.

560 minutes of lesson study and exercises. Actual local research and permitted physical practice take separate time determined by evidence, not a fixed course credential.

Start here

Start with L01–L03 and F01–F03. Define the narrow offer, identify actual authority and coverage requirements, and check qualified demand before commercial purchases.

Read the complete selected methods in L05–L09, then rehearse with permission and competent help on representative eligible items. Paper study and fictional outcomes do not establish practical ability.

Complete an independent full-cycle estimate, customer authority and terms record, and readiness decision before a real booking. Use L12 and L13 to record stopped work and actual costs without rewriting the base case.

First action: Write the two-task offer and its exclusions. Record the first actual legal or practical unknown in F02, and begin the permission-based demand plan before buying the commercial kit.

Course route

Define and investigate the limited offer

L01 Define a small repair visit you can actually deliver. Output: A two-task starter offer with explicit acceptance and referral limits Study and exercise allowance: 30 minutes.

L02 Verify local authority and protect the actual household. Output: A dated operating and property-authority record with unresolved items Study and exercise allowance: 40 minutes.

L03 Check demand before buying commercial equipment. Output: An unsent service profile and a two-week matching demand test Study and exercise allowance: 35 minutes.

L04 Turn a household list into an assessable job record. Output: An item-by-item intake with a go hold or decline decision Study and exercise allowance: 35 minutes.

Identify and rehearse the supported work

L05 Measure compatible parts and buy whole packs. Output: A documented pull fit and door-strip cut plan Study and exercise allowance: 45 minutes.

L06 Rehearse the complete limited visit with permission. Output: A permitted practical record with failed attempts and a next decision Study and exercise allowance: 40 minutes.

L07 Replace matching pulls without altering the cabinet. Output: An item-specific installation and normal-operation record Study and exercise allowance: 45 minutes.

L08 Fit the selected V seal while preserving door operation. Output: A measured installed-strip record and an explicit door-function result Study and exercise allowance: 50 minutes.

L09 Inspect the agreed result and hand back each item. Output: An itemized accepted unresolved or declined result with care and follow-up Study and exercise allowance: 35 minutes.

Estimate approve and control the complete visit

L10 Estimate the whole visit before selecting a price. Output: A full owner-cycle estimate with distinct stock capital and cash Study and exercise allowance: 45 minutes.

L11 Write a complete scope and obtain specific approval. Output: A customer-readable conditional estimate and a dated approval record Study and exercise allowance: 45 minutes.

L12 Control the visit and stop before unsupported changes. Output: A dispatch checklist and a time-stamped item/change log Study and exercise allowance: 40 minutes.

Close the records and decide readiness

L13 Reconcile the order without paying for resources twice. Output: A complete cash stock and management-cost closeout Study and exercise allowance: 40 minutes.

L14 Decide readiness and manage a limited first pilot. Output: An evidence-based readiness decision and a controlled next action Study and exercise allowance: 35 minutes.

Starter boundaries

- New drilling, filling, painting, damaged cabinet fronts, hinge or door alignment, and lock, strike, or threshold changes.
- Fire, smoke, garage-separation, automatic, or accessibility door assemblies; designed ventilation openings; and assemblies whose status is unknown.
- Electrical, gas, plumbing, structural, roof, concealed-services, hazardous-material, or unfamiliar specialist work.
- Universal energy, security, load, or whole-house certification; guaranteed savings; or permission to trade based on course completion.

Files and readiness

The package contains 14 lessons, 14 working forms with separate examples, a complete fictional case, original teaching visuals and a formula planner with an independent Estimate and task-specific working sheets. Counts follow the tasks.

- Actual current local contractor authority, coverage, property permission, and necessary funding are documented.
- Actual matching instructions, parts, substrate and assembly assessment, and complete permitted practice support each offered task.
- Qualified demand at an informed full-cycle price and a realistic route and capacity are established.
- The independent estimate, complete customer terms, applicable notices, specific scope approval, and stop/remedy route are complete.
- Resources, cash, fees, refund limits, and the static baseline reconcile. Unknown inputs are not zero.
- The first unmet condition has a named next action. The fictional case and course completion are not trade qualifications.
