Junk Removal Business Course Program

Candidate version 2 for local review

One operator · assessed accessible light nonhazardous small-load pickup

Learn to test demand, assess items and access, price and agree a small pickup, handle supported light items, plan legal vehicle capacity and securement, use a commercial receiving lane and reconcile the complete order. The worked business setting is Austin, Texas; actual local permissions, vehicle facts and receiving acceptance must be established before work.

The core is accessible private level-ground collection of individually assessed ordinary dry light nonhazardous small items by one capable operator. No customer lifting help, trailer, ramps, bed climbing, heavy furniture, stairs, demolition, refrigerant appliances, batteries, chemicals, sharps, mold, bodily fluids or unknown contamination is taught as an operating service.

Heavy/stair/helper requests are assessed as a separate preparation or decline decision. This course does not teach a universal solo lifting method, a helper crew operating qualification, waste sampling or hazardous/special-waste transport.

5 task modules | 13 lessons | 15 working forms | original pictures and diagrams | 8 sheet formula planner

How to use this course

Prepare one assessed small-load junk-removal offer from demand research to lawful receiving and actual cash. The core uses one operator, ordinary light nonhazardous items and a private level accessible collection route.

Each lesson teaches a distinct decision or action and includes practice with a worked response. Keep your own blank records separate from the fictional examples. Use one complete permitted rehearsal and one linked readiness decision before paid work.

Course program

Module 01 Choose a viable service

Test actual local requests before committing to a vehicle or equipment.

01.1 Test a local small-load offer before committing to a vehicle | J01, J04

Module 02 Prepare the operation and its funding

Resolve authority, receiving, coverage and complete available cash.

02.1 Resolve paid-hauler authority receiving coverage and tax | J02, J09

02.2 Fund readiness and protect household cash | J03, J10

Module 03 Assess and agree the order

Match the actual items, site, vehicle, receiving path and complete quote.

03.1 Inspect the items and route; choose solo, helper or decline | J04, J11

03.2 Prove vehicle capacity, restraint compatibility and the full route | J05, J02

03.3 Price the full cycle and agree a clear quote | J06, J07, J10

Module 04 Perform and rehearse the service

Collect, secure, deliver and reset one supported complete appointment.

04.1 Prepare the work area and collect the accepted items | J04, J08

04.2 Place, restrain and cover the load before departure | J05, J08

04.3 Arrive, weigh and unload in the confirmed receiving lane | J09, J10

04.4 Reset the kit and complete one permitted whole-job rehearsal | J14, J08

Module 05 Find customers and manage the result

Acquire suitable orders, reconcile payment and improve the next decision.

05.1 Find suitable customers and measure acquisition | J01, J15

05.2 Hand over the result and reconcile the actual invoice | J09, J10, J12

05.3 Review fault repeat work and one first-order decision | J11, J13, J14

Connected worked job

Case J follows a $385 net first order through the complete owner cycle, a next customer and a no-charge correction visit. The separate worked-job document and Excel retain every assumption and cost.

Planned access and companion episode

Course materials are free to read and download. Any paid application will be a separate optional product with its own disclosed terms. The course does not include individual trade coaching, consulting, grading, certification or guaranteed earnings.

Optional separate companion episode. A saved publication record schedules December 11 2026 at 6 p.m. Pacific; current public availability was not checked. The video’s $600 less selected $320 cash expenses leaves $280 before omitted costs; it is not profit and is separate from complete Case J. All required written materials are supplied here.
