Mobile Welding Business Course Program

Work, Money & Place | Local review edition v2 | November 21, 2026

A bounded service, evidence and a complete owner cycle.

For an already qualified, competent operator making narrow, detached decorative desktop photo stands in a permitted, assessed work bay. It does not teach untrained do-it-yourself welding or authorize general mobile field repairs.

Build a narrow welding offer

Plan the complete business cycle for detached decorative desktop photo stands in a permitted work bay. This edition is for an already qualified, competent operator. Business lessons, fictional permissions and recorded spreadsheet gates do not train or qualify an untrained person to weld.

Begin with L01. Check conditions and demand in L02 and L03 before buying or accepting paid work.

Five steps to a readiness decision

1. Choose a supported result — L01 / F01. One accepted product and exclusions

2. Check permissions and demand — L02, L03 / F02, F03. Evidence before purchases

3. Rehearse with permission — L04, L05, L06, L07 / F04, F05, F06. Observed setup coupon and quality record

4. Estimate before selecting a price — L08, L09 / F07, F08. Independent estimate and dated accepted terms

5. Deliver record and review — L10, L11, L12, L13, L14 / F09, F10, F11, F12. Completed evidence or documented hold

Stop at missing conditions or evidence. The route is a study order, not permission to sell or perform unverified work.

Make and deliver two detached decorative desktop paper-photo L stands from documented uncoated 1/8 inch mild steel in a permitted, assessed work bay. No installation, load rating or universal field-repair service is included.

An already qualified, competent GMAW operator planning the narrow detached decorative product business described here. A person without demonstrated practical competence must obtain appropriate training and supervised assessment before attempting hot work; reading this course grants no qualification.

Fourteen lessons total 535 minutes of reading and written exercises. Real source checks training permitted practice agency responses and market validation take additional time and are not completed by reading.

Start here

This course follows a small noncritical fabricated product from inquiry to collected payment and records. The course assumes existing practical competence; its text and fictional client approvals do not grant qualifications licenses permits or permission to weld.

Start with a no purchase service hypothesis. Complete the business and site gates, rehearse the exact bounded workflow under appropriate supervision, then use your own evidence to decide whether to offer paid work. All prices times people observations and transactions in the worked case are invented teaching inputs.

First action: Write one accepted product and one explicit refusal from your own demonstrated experience. Then locate a permitted rehearsal bay before buying a machine.

Course route

Supported offer and local evidence

L01 Define a product you can accept and refuse. Output: A bounded offer with an evidence gate. Study and exercise allowance: 35 minutes.

L02 Confirm the business and hot work location. Output: A jurisdiction and site permission record. Study and exercise allowance: 40 minutes.

L03 Validate demand before buying a mobile setup. Output: A two week evidence based demand test. Study and exercise allowance: 40 minutes.

Exact process and permitted rehearsal

L04 Screen the item and turn a drawing into a cut list. Output: An intake drawing material trace and cut plan. Study and exercise allowance: 40 minutes.

L05 Set up the exact selected process. Output: A model matched machine and consumable setup record. Study and exercise allowance: 45 minutes.

L06 Rehearse the bounded fillet weld with permission. Output: A complete supervised rehearsal and hold decision. Study and exercise allowance: 45 minutes.

L07 Fabricate to the drawing and inspect at hold points. Output: A fabrication traveler and final condition record. Study and exercise allowance: 45 minutes.

Cost approval and controlled delivery

L08 Build an independent cost estimate before choosing price. Output: A cost first estimate and cash need. Study and exercise allowance: 40 minutes.

L09 Send complete terms and control deposits and changes. Output: A dated estimate and explicit fictional approval. Study and exercise allowance: 35 minutes.

L10 Run the customer day and close the work site. Output: A time stamped job and site closeout. Study and exercise allowance: 35 minutes.

L11 Hand over the product and respond to concerns. Output: A limited acceptance and correction record. Study and exercise allowance: 30 minutes.

Actual records adverse outcomes and launch

L12 Reconcile inventory earned revenue cash and liabilities. Output: A complete actual financial record. Study and exercise allowance: 40 minutes.

L13 Keep stopped work refunds and corrections visible. Output: An adverse outcome and change disposition. Study and exercise allowance: 35 minutes.

L14 Decide whether the business is ready to launch. Output: An evidence based launch decision. Study and exercise allowance: 30 minutes.

Starter boundaries

- Structural members and building attachments
- Guardrails handrails and fall protection
- Pressure and fuel equipment including all used containers
- Lifting and rigging equipment
- Vehicle and machinery critical parts
- Unknown alloys coatings and hazardous contamination
- Confined spaces marine work and energized installations
- Unsupported positions materials processes and locations

Files and readiness

The package contains 14 lessons, 12 working forms with separate examples, a complete fictional case, original teaching visuals and a formula planner with an independent Estimate and task-specific working sheets. Counts follow the tasks.

- Actual practical evidence for the exact process, material, thickness, joint and position has been reviewed by a competent person. Fictional examples do not count.
- Actual business classification, required licenses and endorsements, tax arrangements, insurance and site permission are documented.
- Exact equipment, manual, serial, consumables, power, ventilation, gas plan and emergency controls match the supported task.
- Actual operator and watcher PPE, named trained watch assignments, complete area coverage, duty times and relief, and the permit-governed post-work inspection or monitoring release are documented. Unknown or missing evidence means hold; an untrained owner cannot substitute.
- The operator can repeat supported coupon and product checks and stop at material, site or quality holds without concealing defects.
- Independent cost estimate includes all owner time, watch, consumed stock, fees, cash, allocations and actual tax obligations. The accepted baseline is saved as dated values.
- Demand and acquisition evidence from the matched population support a bounded pilot before commercial equipment purchases.
- Actual customer terms, acceptance, refunds, privacy and follow up records are complete. Excluded requests remain excluded.
