Mobile Outdoor Power Equipment Service Business Course Program

Work, Money & Place | Local review edition v2 | November 20, 2026

A bounded service, evidence and a complete owner cycle.

Limited mower maintenance

Honda HRN216VKA only: paper filter, oil and spark plug. Begin with permitted nonrunning practice.

Paid work with starting stays on HOLD until a competent instructor provides model-specific failed-stop instruction and verifies all your relevant practical checks.

Begin learning with L01. Check conditions and demand in L02 before buying or accepting paid work.

Five steps to a readiness decision

1. Define the narrow supported service — L01 / F01. An exact model/task offer and named competence gaps.

2. Check conditions and demand before buying — L02, L03, L04 / F02, F03, F04. Current comparison, eligible demand evidence, real operating conditions and an identity/recall gate.

3. Rehearse permitted model-specific work — L05, L08, L09, L10, L11, L12 / F05, F08, F09, F10, F11, F12. Observed task technique, measurements, controlled site/waste and safe stop branches; unlearned work remains unready.

4. Estimate independently and confirm the scope — L06, L07 / F06, F07. Full-cycle prequote cost, static baseline and a complete customer confirmation with specific approval.

5. Decide whether the service is ready — L13, L14 / F13, F14. Matching campaign economics, reconciled records and observable technical/business readiness.

Stop at missing conditions or evidence. The route is a study order, not permission to sell or perform unverified work.

A bounded owner-maintenance menu on an identified Honda HRN216VKA walk-behind gasoline mower with supported GCV170 engine: paper-filter inspection/replacement, oil level/change, spark-plug inspection/replacement, and limited checks only after all operating gates and competence requirements pass. Normally operating equipment only; no general repair mastery or qualification claimed.

First-time US owner-operators with no assumed trade expertise. Technical tasks remain unready until the reader obtains suitable instruction and demonstrates the selected operation on permitted equipment.

640 minutes (10 hours 40 minutes) of lesson study and written exercises, plus separate actual local research, suitable technical instruction and permitted physical rehearsal. This allowance is not a qualification or a promise of how quickly a beginner becomes ready.

Start here

Define the narrow model/task menu in L01/F01, then go directly to L02/F02 for current conditions and demand before buying tools, parts, training equipment or a vehicle buildout. The three fictional comparison rows are practice examples, not local research.

Use the five-stage route and complete case P-001 to connect technical tasks, permission, stock, customer terms and money. Blank own-business records must stay separate from all filled fictional examples.

The course does not establish physical skill, real demand, insurance, legal permission, recall clearance or customer authorization. A missing critical procedure or demonstration keeps that task unready; the failed-stop-control emergency response needs competent model-specific instruction beyond this text.

All essential instruction is written here. Historical video plans supplied the palette and category. Course materials are free to read and download. Any paid application will be a separate optional product with its own disclosed terms. Use the common WMP business reference for the general eight-topic foundations.

First action: Write the supported HRN216VKA routine-maintenance result and your present task skill gaps in F01; open L02/F02 next and make a demand-first wait/buy decision before purchases.

Course route

Choose a supportable local offer

L01 Define a small maintenance menu you can demonstrate. Output: A model-specific offer and a separate evidence gap for each operation Study and exercise allowance: 35 minutes.

L02 Test local demand before buying a mobile kit. Output: A dated same-scope comparison and a buy, revise, or wait decision Study and exercise allowance: 45 minutes.

L03 Resolve locations, coverage, taxes, and waste. Output: A local conditions register with unresolved items marked as holds Study and exercise allowance: 45 minutes.

Identify prepare and agree the visit

L04 Identify the mower and screen the inquiry. Output: A checked identity, recall gate, symptom record, and booking decision Study and exercise allowance: 45 minutes.

L05 Prepare tools, compatible stock, and a controlled load. Output: A task-matched kit, stock issue, and missing-tool hold Study and exercise allowance: 40 minutes.

L06 Estimate the complete visit before naming a price. Output: An independent cost estimate, candidate price, and frozen baseline Study and exercise allowance: 50 minutes.

L07 Write a complete estimate and obtain a specific approval. Output: A customer-readable scope, total, and change policy Study and exercise allowance: 45 minutes.

Perform only the supported tasks

L08 Set the site, inspect conditions, and isolate the mower. Output: A controlled work area and an observed proceed or hold decision Study and exercise allowance: 45 minutes.

L09 Inspect and replace the paper air filter. Output: An identified element, clean sealing path, and latched assembly record Study and exercise allowance: 45 minutes.

L10 Change oil by the supported drain and level method. Output: A contained oil transfer and a repeatable final dipstick reading Study and exercise allowance: 50 minutes.

L11 Inspect the spark plug and install without guessing. Output: A measured plug condition, installation record, and thread-damage stop branch Study and exercise allowance: 50 minutes.

L12 Verify the limited result and hand it back honestly. Output: A task-specific completion record or an explicit unresolved release hold Study and exercise allowance: 45 minutes.

Find customers and close the business records

L13 Run a two-week permission-based demand campaign. Output: A complete unsent profile, inquiry/follow-up drafts, and a matching funnel Study and exercise allowance: 50 minutes.

L14 Close the records and make a readiness decision. Output: Reconciled cash/stock, a documented limited outcome, and an evidence-based launch hold or release Study and exercise allowance: 50 minutes.

Starter boundaries

- Nonstarting or running-fault diagnosis, carburetor/fuel-system work and fuel disposal
- Blade sharpening/replacement/fastener work, drive or cable adjustment and major internal engine repairs
- Riding equipment, unfamiliar engines and trimmers without a separate supported procedure
- Battery equipment, battery-pack repair, electrical modification or cell work
- Guard, brake, interlock or emissions bypass; recall/warranty repairs or claims of authorized service
- Customer mower transport, assumed home repair/drop-off, whole-machine safety certification or guaranteed performance

Files and readiness

The package contains 14 lessons, 14 working forms with separate examples, a complete fictional case, original teaching visuals and a formula planner with an independent Estimate and task-specific working sheets. Counts follow the tasks.

- Exact real mower/engine/emission-label identity matches the selected manual and current recall status is documented, including replacement-engine questions.
- Actual permitted observed practice demonstrates every advertised task, safe isolation/handling, fluid transfer, filter seal, plug measurement/hand seating/torque, correct level check and limited verification.
- HOLD powered practice and the paid package containing a start until competent model-specific failed-stop-response instruction and an observed relevant assessment are documented in F08/F12. Nonrunning practice, reading or fictional P-001 cannot release that booking hold.
- Real base/site activity, zoning, registration, coverage, waste classification/acceptance/storage/transport and appropriate emergency arrangements are resolved.
- Actual qualified demand supports the independently estimated price and full cycle, including acquisition cost; fictional cases and social reactions are not demand evidence.
- A complete customer-readable estimate, specific approval, exclusions/change/cancellation/correction terms, repeatable task checks, stock/cash record and truthful handoff are ready.
- Any unresolved critical condition means wait, narrow the proved offer or refer. No course completion badge overrides technical or business evidence.
